

The background features a blue gradient with several large, semi-transparent circular patterns. Inside these circles, there are sequences of MICR (Magnetic Ink Character Recognition) numbers, which are a series of numbers and special characters used for document processing. The numbers are arranged in a circular path, following the curvature of the circles. The overall aesthetic is technical and modern.

## item processing products

Discover the advantages of our item processing products: Any numbering sequence needed for control documents can be produced on our advanced equipment. We provide a 100% guarantee of MICR readability on our control documents, which helps assure limited downtime on reader sorters. MICR grade paper allows for smooth item processing and low MICR reject costs. We also provide high quality document carriers, check strips and pressure-sensitive labels for incorrect or damaged MICR code lines.

## SPECIALIZED EQUIPMENT & ENHANCED MICR NUMBERING CAPABILITIES

<b>Size:</b>	3¼" x 8¾"
<b>Border Colors:</b>	Blue, Green, Red, Orange, Purple, Black, Yellow
<b>Parts:</b>	Single-Part Forms
<b>Paper:</b>	24# MICR Bond
<b>Minimum Order:</b>	1,000
<b>Standard Thumbcut:</b>	½" thumb cut 3" from bottom 8¾" from right

### Standard Drill Hole Placements:

Standard ¼" diameter,  
3¾" on center from right,  
1¾" from bottom **or**  
2¼" from bottom

- Available with custom drill hole placements

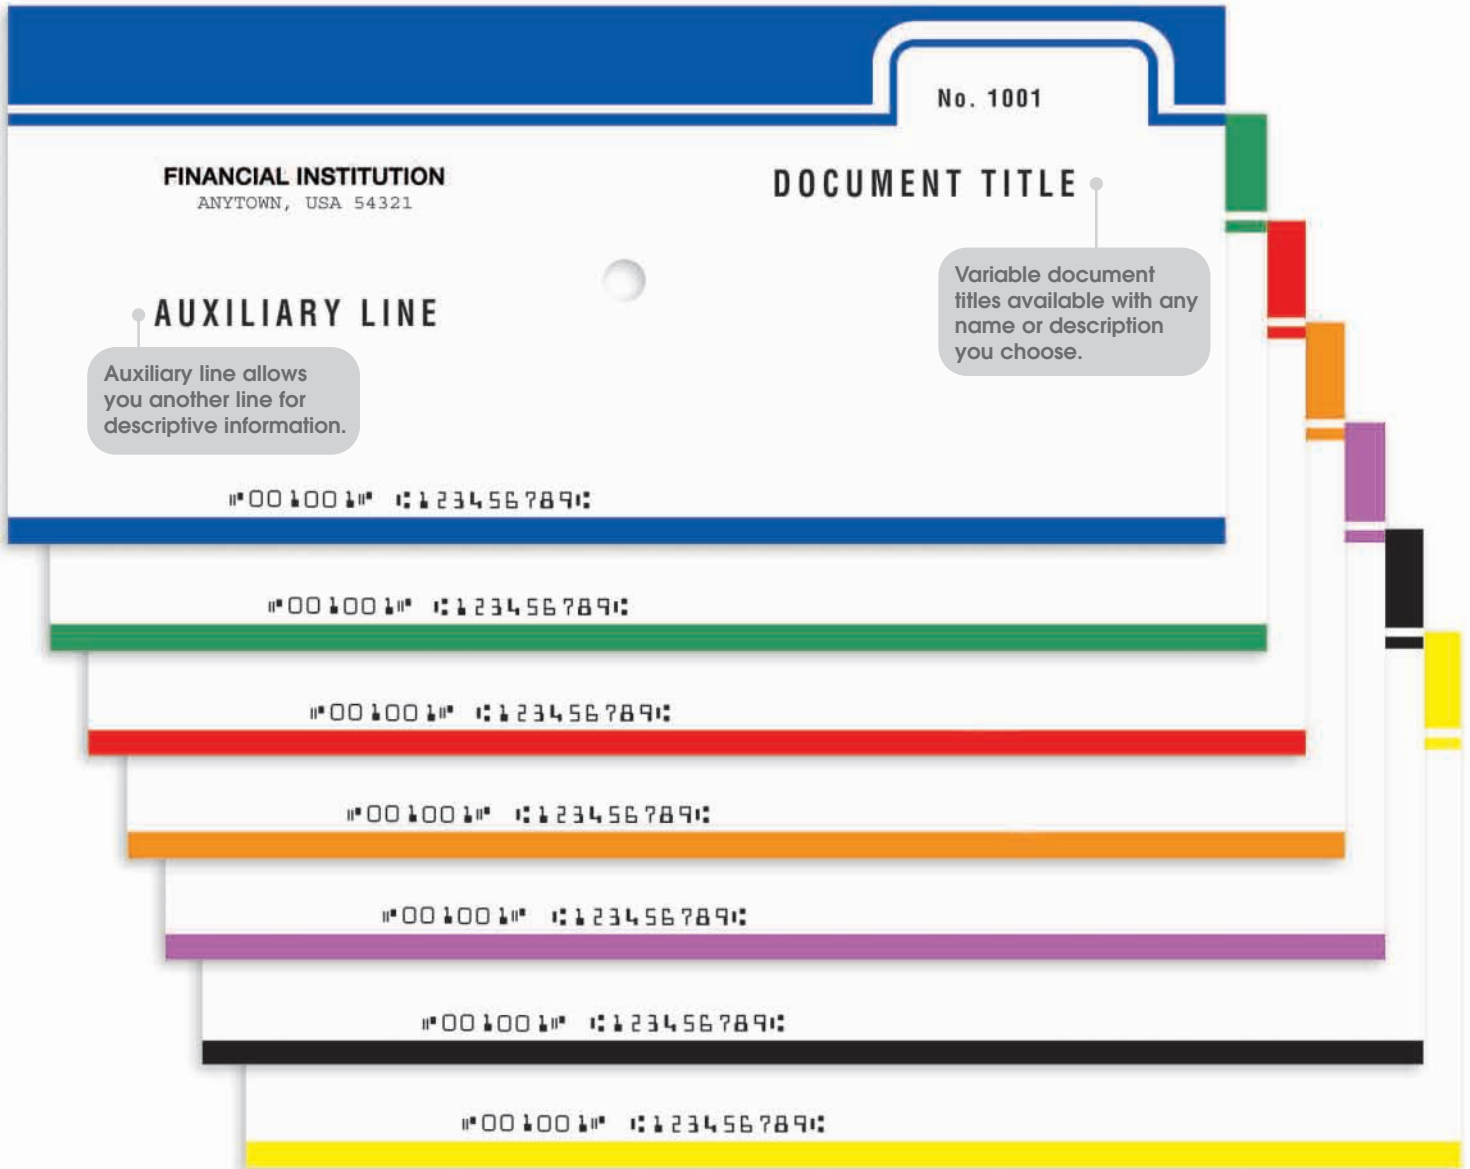

### Variable Information:

- Financial Institution's Imprint
- Static MICR Codeline
- Document Title

### Numbering Capabilities:

- Resets
- Arabic Consecutive Numbering
- MICR Consecutive Numbering
- Book & Page Numbering
- Hold & Repeat Numbering
- Other Special Numbering Requirements

Size: 4" x 9"

Although the Federal Reserve System requires the number 2 to be printed in position 44 in the MICR line, we do not guarantee the readability of this character when preprinted by us, due to potential alignment problems with characters post-encoded at the bank or processing center.

Sealable top.

Translucent front and back for microfilming and image capture.

Heavy duty bond strip for MICR readability and processing durability.
